CEMENT INTEGRITY INTERPRETATION

well*nova*

Know more about the solution's modules and understand how it can improve your interpretation and managing process.

DATA VISUALIZATION

Have a first contact with the uploaded data. Add notes, apply filters, check data quality, and much more.

DATA INTERPRETATION

Access the AI-based interpretation, validate it by merging or changing specific intervals and add comments to generate a complete assessment report.

WELL SIMULATION

Emulate the acoustic logging for a given well section with 1D, 2D or 3D numerical models.

DECOMMISSIONING & WORKOVER

Keep up with your well processes through dashboards and management features.

P&A PLANNING

Access summary barrier information, correlate wells, manage P&A expenses and documents.

Module Manual — Detailed interpretation — Carl Marshall — User mode
ults Comparison — New interpretation — Export graphs — Generate report — Save analysis

2	3	4	5	6
CCLU	VDL	Impedance	Impedance	CCLU
CBL [mV]	-20K 0 20K	-50 10	0 5	-50 CBL [mV]

REGULATOR AREA

Submit and follow up with your ANP reports.

API MODULE

Add the interpretation feature to different softwares.
