

CEMENT INTEGRITY

Interval by interval cement assessment.
Results comparison.
Advanced data visualization features.
Management area.
Integration with Regulator's system.

DIGITIZATION

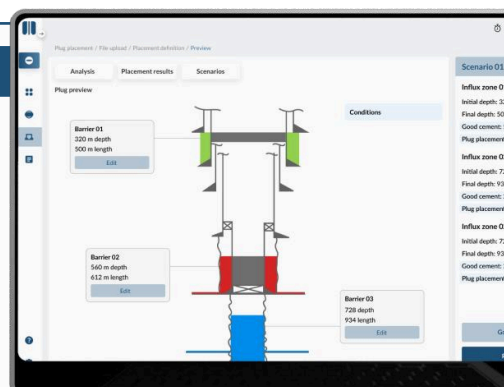

Digitize PDF or scanned files.
Control which informations are important.
Create and control databases with your digitized and uploaded files.
Interpret the digitized files quickly.

SMART PLUGGING

COMING SOON

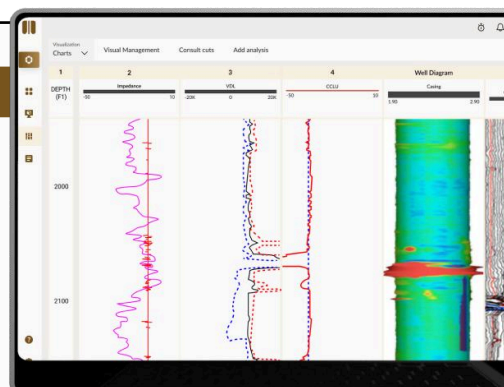

Plug placement suggestion and leakage rate assessment.
Simulate scenarios and compare results to support final P&A design.
Final report with selected solution outcomes.

CALIPER

COMING SOON

Data visualization.
Visualize specific well sections.
Caliper data interpretation report.

ADVANCED FAILURE ANALYSIS

COMING SOON

Improved bond quality assessment detailing the defect in the cement sheath.
New features added to the interpretation module.
